Profile

Dynamic and innovative Web Programmer Internship with Ministry of Communication and Information Technology (Diskominfo), Store Employee at Air Mancur Store, and Production Administrator at PT. Untung Bersama Sejahtera. Expertise in developing CRUD apps with CodeIgniter, managing inventory, and maintaining production records. Skilled in frontend development, inventory management, and database maintenance. Eager to leverage my diverse experience and passion for frontend development in a Front end Developer role.

Employment History

Frontend Developer, Graphic Design, Entry Data, Freelance

AUGUST 2022 – PRESENT

- Creating a beautiful website design using React and making it responsive.
- Developed macros to automate data entry and reduce time spent on manual data entry
- Developed a custom UI library that increased developer productivity and code reuse
- Created detailed design specifications that communicated design intent to developers and stakeholders

Production Administrator, PT. Untung Bersama Sejahtera, Surabaya

OCTOBER 2021 – APRIL 2022

- Maintained production records, including production reports and logs
- Maintained and updated production logs to track production statistics and performance data
- Developed and maintained production databases to ensure accurate tracking and reporting of production data

Store Employee, Air Mancur Store, Surabaya

JULY 2020 – OCTOBER 2021

- Managed store inventory, ensuring accuracy and availability of products
- Maintained a neat and organized store, resulting in an increase in customer purchases

Education

Vocational High School, SMK Kawung 1, Surabaya

JULY 2017 – MAY 2020

I graduated from SMK Kawung 1, majoring in Software Engineering. During my studies, I gained practical skills in software development, programming, and technology, preparing me for a career in tech and IT.

Internships

Web Programmer Internship, Ministry of Communication and Information Technology (Diskominfo), Surabaya

MARCH 2019 – MAY 2019

- Creating a CRUD app with the CodeIgniter backend framework and Bootstrap for the frontend.
